

**Note!**  
1. Technical modification reserved.  
2. Keep the instruction.

**Device characteristics:**

1. Possibility to store 8 independent individual programs.
2. Possibility of assignment single days of the week to each program or creation a group of days with many combinations.
3. Possibility choice of one of the available programs (RANDOM).
4. Cycle programming keeping regular repeatability of programs.
5. Programming accuracy: 1min.
6. Readable, precise LCD.
7. Function which enables to review current settings of the Electronic Timer.
8. Display of current time setting – clock function.
9. Easy to operate control panel.
10. Function of simple change the summer time to winter time and vice versa.
11. Battery maintains mode and memory of programs in case of power interruption (above 100 hours when the battery is fully charged).
12. Push-button **MASTERCLEAR** for quick clearing all settings of the Electronic Timer and a clock.

**Read before using:**

1. Electronic Timer can be connected only to the socket 230V~50Hz.
2. Electronic Timer can cooperate with devices which are of protective category I and voltage 230V~50Hz.
3. Electronic Timer is designed for cooperation with devices:  
- with resistance features (e.g. incandescent, halogen lighting, electric oven, water heater, etc.)  
- with induction features (e.g. lighting fitting with induction stabilizer compact fluorescent lamp with maximum power input 2A).
4. Before connection any device to the Electronic Timer please check whether the manufacturer of the given device permits the cooperation with this type of Electronic Timer.
5. Electronic Timer disconnects only one of the supply circuits (contact L – live or contact N – neutral) which depends on the type of electrical system.
6. It is not allowed to use this device outdoors. Electronic Timer can't be exposed to moisture, dust and other adverse environmental conditions (protection class IP20).
7. Electronic Timer must be protected from high temperature, sunlight and mechanical damages.
8. This device can't be connected to the extension cord or other Electronic Timer.
9. Device with movable mechanisms can't be connected to this Electronic Timer.
10. In case of any failures in the work of the Electronic Timer, you must stop using it immediately.
11. It is forbidden to unscrew or open the Electronic Timer and conduct any unauthorized repairs.
12. Clean it with only soft, dry cloth, it isn't allowed to use any detergents.
13. Do not damage.
14. Importer/Supplier reserves the right to do any technical changes in the device without notice.
15. Importer/Supplier isn't liable to any damages due to any unauthorized technical changes, repairs and not observance of this instruction's provisions.

**User's instruction:**

- First usage:**  
1. Connect the Electronic Timer to the socket 230V~50Hz and wait until clear symbol appears on the display (it can take even several dozen minutes – it depends on the time of charge of the battery).  
2. It is recommended to leave it for 12 hours connected to the supply circuit before using to charge the battery which maintains the memory of Electronic Timer.
- Setting of hours and days of the week:**  
1. Keep pressed the button **CLOCK**, and press simultaneously the button **WEEK** to choose day which is indicated by symbols on the display:  
- MO – Monday  
- TU – Tuesday  
- WE – Wednesday  
- TH – Thursday  
- FR – Friday  
- SA – Saturday  
- SU – Sunday

2. Still keeping pressed the button **CLOCK** set the actual hour and minutes using the button **HOUR** (hour) and **MINUTE** (minutes).
3. Still keeping pressed the button **CLOCK** and simultaneously pressing the button **TIMER** you can change the format of displayed time from 24 h to 12 hour (AM, PM) and vice versa.

**Programming:**

1. Press the button **TIMER** once and it switches over the device into the mode of the first usage – number 1 and a symbol ON shall appear in the left corner, below the button **TIMER**.
2. The button **WEEK** selects the days, when given program shall be active – you can select specific day of the week or groups of days from the sets below:  
- MO, TH, WE, TH, FR, SA, SU  
- MO, TH, WE, TH, FR  
- SA, SU  
- MO, TH, WE, FR, SA  
- MO, WE, FR  
- TU, SU  
- MO, TU, WE  
- TH, FR, SA  
- MO, WE, FR, SA

3. The button **HOUR** (hour) and **MINUTE** (minutes) selects hour when the Electronic Timer should be activated.

4. Press the button **RES/CLEAR** to select the time of switching off the system (clock off shall appear).

5. According to paragraph 2 and 3, select the day (days) of the week and hours when the Electronic Timer should be switched off.

6. If you press the button **TIMER** again the device shall select the next program. You can set maximum 14 different programs for switching on/off of the device.

7. If you press the button **CLOCK** the device leaves the programming mode and the current time appears on the display.

**Blocking of performance of chosen programs:**

1. Using the button **TIMER** you can select the program we want to block or release.

2. We can switch on/off a given program by the button **RES/CLEAR**.

3. If we want to deactivate a given program “---” shall appear on the display.

- Electronic Timer control:**

1. Switch **ON/AUTO/OFF** can be used to choose the following modes:

- MANUAL (ON symbol on the bottom of the display) – device is on, independently of time setting.

- MANUAL OFF – the device is off independently of time setting.

- AUTO – Electronic Timer performs current program.

2. When the button **ON/AUTO/OFF** (switch on) or **MANUAL OFF** (switch off) into the mode **AUTO**, this device remains in the given mode (on/off) until it meets the next program.

**Function of automatic random on/off (RANDOM):**

1. Pressing the button **RANDOM** in mode **AUTO** causes changing the mode into random selection of programs (symbol **RANDOM** shall appear on the right side of the display).

2. The button **RANDOM** or **WEEK** can be used to choose the following modes:

- MANUAL (ON symbol on the bottom of the display) – device is on, independently of time setting.

- MANUAL OFF – the device is off independently of time setting.

- AUTO – Electronic Timer performs current program.

3. When the button **RANDOM** or **WEEK** is pressed the device remains in the given mode (on/off) until it meets the next program.

**Function of automatic random on/off (RANDOM):**

1. Pressing the button **RANDOM** in mode **AUTO** causes changing the mode into random selection of programs (symbol **RANDOM** shall appear on the right side of the display).

2. The button **RANDOM** or **WEEK** can be used to choose the following modes:

- MANUAL (ON symbol on the bottom of the display) – device is on, independently of time setting.

- MANUAL OFF – the device is off independently of time setting.

- AUTO – Electronic Timer performs current program.

3. When the button **RANDOM** or **WEEK** is pressed the device remains in the given mode (on/off) until it meets the next program.

**Setting of hours and days of the week:**

1. Keep pressed the button **CLOCK**, and press simultaneously the button **WEEK** to choose day which is indicated by symbols on the display:

- MO – Monday

- TU – Tuesday

- WE – Wednesday

- TH – Thursday

- FR – Friday

- SA – Saturday

- SU – Sunday

2. Still keeping pressed the button **CLOCK** and the actual hour and minutes using the button **HOUR** (hour) and **MINUTE** (minutes).

3. Still keeping pressed the button **CLOCK** and simultaneously pressing the button **TIMER** you can change the format of displayed time from 24 h to 12 hour (AM, PM) and vice versa.

4. Releasing the button **CLOCK** the device leaves the programming mode and the current time appears on the display.

5. Function of simple change the summer time to winter time and vice versa.

6. Battery maintains mode and memory of programs in case of power interruption (above 100 hours when the battery is fully charged).

7. Push-button **MASTERCLEAR** for quick clearing all settings of the Electronic Timer and a clock.

8. Easy to operate control panel.

9. Function of simple change the summer time to winter time and vice versa.

10. Function of simple change the summer time to winter time and vice versa.

11. Function of simple change the summer time to winter time and vice versa.

12. Battery maintains mode and memory of programs in case of power interruption (above 100 hours when the battery is fully charged).

13. Push-button **MASTERCLEAR** for quick clearing all settings of the Electronic Timer and a clock.

14. Easy to operate control panel.

15. Function of simple change the summer time to winter time and vice versa.
